

## Manufacturer's declaration following REACH regulation

---

Dear customer

REACH is a new regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals. This regulation came into force on 1 June 2007. It simplifies and improves the previous legislation on chemicals in the European Union (EU).

As a manufacturer of valves and fittings, Sistag AG is a 'downstream user' in terms of REACH and consequently not subject to registration.

Any chemical substances and preparations which may be subject to registration, and which are contained in our products must be registered exclusively by our upstream suppliers.

In our own interest and in order to ensure a high level of product safety, we pursue the implementation of REACH and the resulting requirements precisely.

We have contacted our suppliers who provide us with chemical substances and preparations (auxiliary materials, lubricants, adhesives, paints, lacquers).

Our processes involve widely used applications which are common practice in a wide range of sectors. Against this backdrop, our suppliers have indicated that preregistration and/or registration of the relevant substances has been carried out and that as a result the REACH regulation has been observed.

You can rest assured that Sistag AG will meet its obligations regarding REACH in a timely fashion.
