

Wey TF20

- Double flanged body ductile iron EN-GJS-400-15
Corrosion protection C4 according to EN ISO 12944-2, 240 µm
- Face-to-face dimension EN 558-1 series 13, DIN 3202 F16
- Disc stainless steel CF8M (1.4408) with polished edges
- Vulcanised seal with grooved flange sealing surfaces
- Shaft stainless steel AISI 420 (1.4021) with blow-out protection and position indication
- Shaft bearing for low torque
- Actuator flange according to ISO 5211
- Bi-directional leak tight according to EN 12266-1 leakage rate A
